

## **DUFAMIN ORAL**

### **Composition:**

Contains per ml solution:

|                        |         |
|------------------------|---------|
| Phosphor .....         | 92.8 mg |
| Manganese .....        | 10.8 mg |
| Iron .....             | 9.7 mg  |
| Zinc.....              | 10 mg   |
| Sodium .....           | 5.5 mg  |
| Cobalt .....           | 124 mcg |
| Copper.....            | 5.6 mg  |
| Calcium.....           | 15.3 mg |
| Choline chloride ..... | 82.5 mg |

### **Description:**

Dufamin Oral is an oral solution containing essential minerals, trace elements and choline. These are essential for many metabolic functions, especially for bone composition, maintenance of osmotic pressure and enzyme activation. Choline and its metabolites are essential for structural integrity and signalling roles for cell membranes, cholinergic neurotransmission (acetylcholine synthesis) as well as being a major source of methyl groups for metabolic reactions.

### **Indications:**

Treatment and prevention of essential mineral, trace elements and choline deficiencies in poultry, caused by:

- increased requirements due to stress or illness, growth, production or performance.
- decreased intake due to feed quality, inappetence or general weakness.

### **Dosage and administration:**

For oral administration in drinking water.

Recommended dose..... 500 – 1000 ml per 1000 litres of water

Shake well before use. Once diluted, Dufamin Oral should be used immediately and refreshed every 24 hours for the duration of the treatment.

### **Withdrawal times:**

None.

### **Storage conditions:**

Store dark and below 25°C. Do not freeze.

### **Packing:**

1 litre bottles.
